

YAMAZAKI MAZAK model VARIAXIS i-700

Machine center for 5-axis simultaneous operations, with numeric control **MATRIX 2**. The machining capacity to operate on top surface, side surfaces and any intermediate surfaces, enables the full machining of the part with a single machine setup. In addition, the controlled simultaneous machining on 5 axis gives the possibility to perform complex profiles.

DELCAM – POWERMILL 2013

PowerMILL is the flagship product of Delcam for milling of 3, 4 e 5 axis, an independent CAM system which allows a rapid creation NC toolpaths directly from CAD models. Complemented by a powerful interface that allows us to accept data from any CAD system, via IGES, VDA, STL or various type of direct files converters.
